

**Nuchal translucency (NT) measurements for
Integrated Prenatal Screening (IPS)**

- NT measurements for IPS are currently available at a variety of locations (see below). Please note: additional locations may become available within and outside of Ottawa in the near future, and NT measurements not obtained from approved locations will not be accepted for IPS.
- **Requests for NT appointments should be made by phone or fax to the ultrasound unit, not by using the telephone number on the laboratory requisition or IPS patient pamphlet.**
