

Assessment Preparation Checklist

Child's health card

Parents and legal guardians have scheduled time in order to attend the diagnostic assessment visit(s)

Only parent(s) or legal guardian can bring the child to the first appointment

Alternative arrangements made for siblings

It is important for your child to focus on the requested assessment activities, so we ask that brothers/sisters not come to the appointment(s)

Reports not previously shared with the Development and Rehabilitation program are collected

Bringing these reports to the appointment(s) will help us understand your child. Reports to bring include health documents (e.g., speech-language therapy, occupational therapy, and medical reports), and school documents (e.g., report cards and program plans)

If you already have a diagnostic/assessment report from a developmental pediatrician/pediatrician or psychologist, please notify us ahead of time

I have a diagnostic/assessment report, who do I contact? Please contact Nicole Hammond, Psychometrist, at 613-737-0871 x2904

Nut-free snacks

The diagnostic assessment appointment(s) can last a few hours
