

COVID-19

COVID-19 can make people sick.

To help us not get sick, we need to:

wash hands a lot, and really well

stay at home (NO school

NO seeing friends

keep away from others (4 GIANT steps, or more

We have to do this until COVID-19 goes away.

Sometimes this might be hard.

It is OK to feel this way.

Just do your best to stay nice.

When there is NO more danger of COVID-19

we will go back to

school

and see friends

We will be OK!
